The goal of the academy is to prepare students for the business world of today with tomorrow in mind. The Academy of Digital & Media Arts is part of a

Career and Professional Education (CAPE) Academy. Within the CAPE Academy, students choose the career path they wish to pursue. The Academy of Digital & Media Arts at LSHS offers the following tracks: Television Production, Digital Design, Digital Photography, Gaming & Simulation and Web Design and Development. Each track provides students with the necessary skills to pursue a career in digital media arts or continue their education for an advanced degree. Upon graduation, students will not only acquire a diploma, but industry certifications that will make them highly employable in a field that is in high demand, with high growth and high pay.

The Academy of Digital & Media Arts program is based on developing every student's artistic ability in digital communications. The media arts students express their creativity primarily through film, interactive web site creation and digital design. Our classrooms are outfitted with state of the art equipment including professional cameras, enhanced computer editing terminals, and industry standard software.

Students enrolled in our program will use the most up to date versions of Adobe Creative Suite and Microsoft Office. Students who complete the program will gain the training and experience necessary to enter an advanced media arts program, or embark upon a career in digital and media arts.
